

SLIDE 1

# AccessFlow 48

SCIF access sequencing concierge that prevents avoidable schedule slip.

SLIDE 2 • PROBLEM

## **Access dependencies break timelines**

- Badge/escort windows missed
- Contractor sequencing conflicts
- Late blocker discovery in secure environments

SLIDE 3 • SOLUTION

## **48-hour sequencing command loop**

- Readiness checks every 48h
- Dependency board + escalation map
- Daily PM/security brief

## Revenue

- Concierge sprint fee
- Monthly continuity subscription
- Expansion to workflow software

SLIDE 5 • WHY US

## **Founder edge + adjacency**

Leverages ClearedConnect labor access and ShieldSpec scope discipline in one operational lane.

SLIDE 6 • ASK

## Pilot-focused growth

Target: pre-sell 1 pilot, convert to retainer, capture repeatable playbook.

## SECURITY & CONFIDENTIALITY

# **Sensitive information protection is core to delivery**

- Emails, blueprints, and package artifacts handled under strict confidentiality
- Need-to-know coordination and least-privilege access handling
- No external sharing without explicit client authorization
